Let old songs return to the present

New music is not the only music that deserves a present-tense reading. A work that survives ten or twenty years changes position through performance practice, instrument culture, live scenes and the listener’s own life. TMFD No. 01 begins there: following releases from October 5–11 while reopening records that have already proved they can last.

> Time does not seal a song away.
> It changes where we stand.

Revisiting a record lets today’s ears measure detail, proportion and space again.

The catalogue line moves from TOOL, Animals as Leaders and Tigran Hamasyan toward Polyphia, Plini, Covet, Laufey and No Party For Cao Dong. This is an editorial sequence across progressive metal, instrumental rock, jazz, independent pop and Taiwanese rock. The shared thread is a strong identity between parts, and the way repeated material changes role over time.

Reading needs arrangement

The issue therefore treats neither catalogue music as a ranking nor new releases as a news list. Each spread sets up a material correspondence: weight beside brightness, density beside air, precision beside looseness. The reading order acts like an arrangement, allowing works from different years to alter one another on the page.

TOOL

Schism

Schism keeps its syncopation, accents and bass motif instantly legible without reducing the piece to a technical display. The same material changes position, weight and emotional pressure. A quarter-century later, precision and physical force still occupy the same frame.

Animals as Leaders

Physical Education

2014

Animals as Leaders at the 2014 NAMM Show. Archive image.

ArtBrom from Seattle · CC BY-SA 2.0

Physical Education combines metric illusion, percussive guitar tone and immaculate separation into a sharply shaped instrumental. Technique serves form: the opening locks together like machinery, then melody and drums cast the material in a different light. It remains a useful portal into modern progressive music that values memory as much as complexity.

Rhythm has more than one touch

Tigran Hamasyan

Drip

2013

Tigran Hamasyan performing in 2017. Archive image.

Arman Ayva · CC BY-SA 2.0

Drip places Armenian melodic language, the piano’s percussive edge and jazz ensemble motion inside one breath. In the official live studio recording, rhythm is never an abstract calculation; it is bodily pressure passed between players. Read beside heavy instrumental music, the shared concern is accent, while the touch is entirely different.

Polyphia

G.O.A.T.

2018

Polyphia in Toronto, 2023. Archive performance image.

Makeworldpedia · CC BY-SA 4.0

G.O.A.T. recasts guitar virtuosity through pop production, 808 weight and a lucid beat. The lines appear dense, yet tone, silence and contour are what linger. It marks Polyphia’s decisive turn: technique stops functioning as an insider code and becomes sound design with direct access to popular culture.

Plini

Electric Sunrise

2016

Plini with Simon Grove on a European tour, 2017.

Raulongo · CC BY-SA 4.0

Electric Sunrise draws power from proportion. Clean tone, granular rhythm guitar and long melodic lines retain their own air, so the climax feels like an alignment of parts already set in motion, rather than an accumulation of notes. It makes brightness feel substantial.

shibuya preserves a light, intimate and almost handmade surface beyond math rock’s intricate technique. Yvette Young’s melody never rushes to prove difficulty; harmonics and empty beats organise the room. San Holo arrives like a thin wash of light, drawing Covet’s early sound toward a city at night.

Laufey

From The Start

2023

Laufey at Radio City Music Hall, 2024. Archive performance image.

IndieCabaretNYC · CC BY 3.0

From The Start shows that a vintage vocabulary need not become nostalgic imitation. Jazz harmony, a bossa nova pulse and a decisively contemporary voice settle into an effortless three minutes. Its polish comes from proportion: each chord, pause and syllable knows how much room to occupy.

Listen past the vintage vocabulary to the pauses and decays that keep the song in the present.

No Party For Cao Dong, Simon Says official video, 2016.

/ No Party For Cao Dong · Official video · editorial use

Simon Says turns generational anxiety into a rough melody that a room can sing together. Guitar, drums and voice retain their edges, which lets the chorus become a sudden common language in public space. It endures because frustration is never processed into a pretty answer.

The chorus regathers parts that first seem unstable, giving roughness a deliberate proportion.

The long life of a motif

Identity before difficulty

Music often lasts not because it is the most difficult, but because it establishes a physical identity quickly. The bass of Schism, the tonal contour of G.O.A.T. and the harmonic gait of From The Start tell the listener where they are before the full work has unfolded. Technique first becomes a system of recognition.

Repetition must survive change

Durable repetition is rarely simple duplication. A bass note moves, the drums shift gravity, a melody enters late, or a leading part recedes. The material remains identifiable while its relationships change. Precision and feeling are therefore compatible: one makes change perceptible; the other makes it memorable.

Players give structure temperature

A score can mark metre and notes, but it cannot replace touch, decay and the exchange between bodies. Tigran Hamasyan and Animals as Leaders both work with highly organised rhythm, yet the former breathes through piano and ensemble elasticity while the latter polishes guitar-and-drum edges to a hard shine. The useful comparison concerns how structure passes through hands and space before becoming sound.

Boss Keloid

Pedestal

06 OCT · 2026

A riff kept in the archive for a decade finally finds its place. Pedestal draws weight from more than distortion: sections stretch, turn and press the opening material back into the centre. It is the second entry into Float & Aperture, due October 23 through Church Road Records.

Far Country deliberately reduces the tool set, asking distorted guitars and structure itself to carry momentum. For a post-rock band long associated with scale and layering, that restraint feels unusually bold. Caspian’s self-titled album follows on October 16.

Edge Conditions

09 OCT · 2026

Synthesizers, drums, saxophone, viola and field recordings form a system that keeps changing shape. Plastic Mind / Elastic Machines states the method most clearly: repetition is not a static bed, but a device that rewrites the direction of attention. The album preserves a productive friction between electronic composition and improvising ensemble.

All Over You

The seventh album refuses to turn thirty years into a solemn retrospective. Its title track stays bright, mischievous and lightly abrasive, while harmonies and rhythm keep a dance-floor sense of motion. Imperial Teen’s maturity lies in knowing when a short song should turn and when it should simply end.

Instruments are not an appendix

How sound takes shape

Instrument writing becomes interesting when a tool changes the grammar of composition and performance. The range of an eight-string guitar, the balance of a headless design, cymbal decay, or resistance between neck and picking hand determines whether a phrase can be voiced with its intended speed, gravity and grain. Gear belongs to music culture, not merely shopping information.

Abasi Concepts writes the demands of extended-range playing into body proportion and ergonomics. Its interest lies in the feedback between design and musical language, rather than celebrity association alone.

Matt Garstka / Meinl

Matt Garstka’s drumming asks cymbals to balance a defined edge with quick decay. The musical requirement matters more than one model: metal must let dense rhythm retain air.

Decay decides the phrase ending

Diameter, weight and hammering shape attack, decay and frequency spread, deciding how much air survives between dense accents. When guitars and low frequencies already fill the field, a quick, articulate disappearance becomes part of the arrangement.

The next issue still begins with records

New releases will remain the first verification priority, while catalogue music will no longer sit in the background. Each issue will let enduring records illuminate the week’s arrivals, presenting music history, current scenes and instrument culture as one continuum.
